

# Xylitol – Safe for You Dangerous for Your Dogs!

**Xylitol** is a natural sugar alcohol. It is increasingly found in many common “sugar free” and “naturally sweetened” products for people. While it is safe for you, **Xylitol is deadly to dogs!** When it comes to dogs, xylitol packs a stronger “Toxic Punch” than dark chocolate.

## Chocolate vs. Xylitol (gum)

The amount it would likely take to **kill** a dog

### Xylitol poisoning signs include

- Vomiting
- Staggering
- Weakness
- Collapse
- Seizures
- Bleeding
- Stomach Distention
- Coma
- Death

**Xylitol quickly drops a dog's blood sugar and can cause devastating liver failure.**

### Xylitol can be found in

- Candies & Chewing Gums
- Peanut & Nut Butters
- Toothpastes & Mouthwashes
- Cosmetics & Hand Creams
- Cookies, Cakes, Ice Creams & much more
